All the run-and-gun action of the original A.R.E.S. with some reworked mechanics that work in the game's favor. First, there is only one type of scrap now. This means that you no longer need to grind for the 3 different types like you did in the original. Second, you now have to find upgrade chips before you are able to build the upgrade. This effectively stops players from getting really overpowered too early on. Third, there are some reworked levels. Those can be good or bad depending on your opinions. Finally, there's the added character Taurus. He's more tanky than ARES, and all of his weapons are shorter ranged, but with more area of effect and a slightly different story line. Overall, this game is on par with the original, if not a little bit better. However, it would be definitely better if they would add in the Berserker suit and soundtrack already!. spent money to boost my deck into getting defeted quickly. dont waste your money. Now, full disclosure, I am friends with the creator of this game, and had watched he work on this, and I play tested this when it was still in the early stages. So take my review with a grain of salt if you would like.

Now that that's out of the way, I will say I greatly enjoyed the final product Michael made. It's come a long way from the early builds I helped test. The puzzles are stream lined with out being too diffuclt (Though granted I knew how to get past the ones I got stuck on before), but having the right leve of challenge to give me pause to think about the solution. The only issue I had would be some minor sound issuus .

Over all it's a fun and quick game to play, and worth checking out.

. this game is very interesting and unique, and peacfull i like it, and this is coming from someone who likes shooting and action. Grate job who ever made the game :) thanks for making it i give 5 star. For a prototype made by 2 people , it was really good. Awesome that they kept working and released 3 games in the "Doorways" series.. After the first tutorials - that game is very good already!. Very impressed so far!! Definitely my favourite vr archery game keep it up guys :). Some achievements are ridiculous and, unlike Pixel Puzzles Japan, I don't think the art of the puzzles are nice. Also, it works almost the same as PP Japan with the point and click to select pieces and it does have some flaws.

The menu mini-game need a pause button, because its achievements are ridiculous! Ohhh, maybe it is a good idea to make the player kill 5000 zombies. In a sit. Which takes more than 1:30 hours.... Nie\u017ale. I absolutely love this game. One of the earliest memories i have is my dad loading this up for me to play on the family computer and might of even been the reason ive been playing videogames for the past 26 years or so since! still a great game that is fun to play and brings back so many things that i forgot i knew about this game. thanks for the fond memories

This is the second best two-finger arcade game ever, after One Finger Death Punch.

It's one of those use-thrusters-to-take-off-and-land-in-the-right-spot games that have been around forever, but it's exciting, rewarding, and really clever with the use of weapons, obstacles, and upgrades. Get it., GameV10. Good game. good play. very scary, and only getting better.. Fun Simple Game, Clever mechanics.. Odd sense of humor and graphics that reminds me of old Sierra games. Fun.. Review of the Game: <https://youtu.be/ITVX0EG1mYg>

My take on this game is that it has potential and a lot of similar aspects that make up a survival simulation. Has unique features with finding chests but could do with a lot of work, but hopefully will continue to get better with more support.

Quite bare bones with what can be done but as said still early access so hopefully over time more crafting mechanics and enemies will become present. Would recommend more once the game has further updates to increase playability. Also has permadeath which adds more to the survival element though should be an option.. Old school adventure platforming love letter, without carbon copying everything.

Contrary to other comments, I don't find the game at all difficult - but I actually grew up conquering Zelda 2 to the point where it was actually easy, so the game is understandably challenging(without feeling cheap)

Original and a very, very good title. Kudos!. Movement in VR is still a pickle they are trying to dig out of the bottom of the jar. Games like this have a solution and that is you sit in a vehicle, very clever. However, sitting in a vehicle and seeing movement but not feeling movement (inner ear) causes motion sickness. This is the one and only game I experienced any motion sickness with.

Great game, best enjoyed in 10minute bursts...or on dramamine.. Not only do half of the items you're searching for require you to click just so (not even in hidden object segments, but puzzles and even picking things up) but some of the puzzles involve things like being able to distinguish between four slightly different shades of green while only letting you view one at a time.
