## What's New In PrintKey 2000?

Capture and edit screenshots using a simple but powerful user interface, and print them with customizable options. PrintKey 2000 lets you add text, select an area, preview your screenshot in real-time, and also supports time-lapse and video recording. What is it: Capture and edit screenshots using a simple but powerful user interface, and print them with customizable options. #Capture and edit screenshots Capture or edit screenshots taken with PrintKey 2000 without ever opening the program. First, PrintKey 2000 allows you to select an area of the desktop or any individual object by dragging the mouse cursor. You can also specify the exact coordinates to capture by using the included calculator. #Write images to disk Second, PrintKey 2000 lets you insert text and change the background color, as well as customize the appearance of your screenshots by adding elements like frames, transparency, and gradient backgrounds. This allows you to create a variety of custom images for different uses. #Print supported devices Finally, you can print your screenshots directly from the application, as well as insert them into new documents. PrintKey 2000 supports text, color, and monochrome printing. Also, you can specify custom paper sizes and margins in order to make the output fit exactly your needs. Note: PrintKey 2000's editor offers basic image editing functions, such as changing the color balance and adding effects. It's not able to make extensive modifications to your screenshots, however, and if you're looking for a more complicated image editor, you should download and install an alternative instead. #Technical Capture window screenshots Capture selected area of window screenshot Capture selected area of screen without window Capture window screenshot and set coordinates Capture a small part of screen Capture full screen Capture selected window area Capture window area and set coordinates Capture window content #User Interface Manage one window screenshot Capture one object screenshot Create watermark for screenshot Window screenshot support video Selection colored Selection window Display resolution #Editing functions Edit string Customize the window screenshot Add watermark to screenshot Calculate the
